WORK EXPERIENCE

Intermediate Software Developer | Filcan Global Envelope Strategies Inc., Philippines DEC 2022 – PRESENT

- Developed and supported 15+ integrations connecting mobile operators/aggregators with a microservice-based ecosystem across international markets.
- Analyzed integration requirements, clarified technical details with partner POCs, and raised technical feasibility concerns when needed.
- Identified affected services and prepared technical implementation plans for integration projects.
- Developed, tested and validated backend updates across test, staging and production environments.
- Investigated bugs, maintained integrations, and implemented changes as partner requirements evolve.
- Performed code reviews for integration and development tasks.
- Created Python scripts for sales and subscription reporting as needed.
- Led onboarding and technical training for 10+ developers as Head of Training Committee.

Software Developer | Adipster Tech Limited, Hong Kong SAR JAN 2021 – JUN 2021

- Developed backend applications using Python, Flask, and Django across multiple projects.
- Implemented features and resolved backend and frontend issues.
- Handled frontend fixes with JavaScript and Bootstrap.
- Worked with MS Azure and Git/Github for development and deployment workflows.

Data Analyst | Top Market Marketing, Philippines JUN 2019 – DEC 2020

- Analyzed sales, finance and logistics data for operational and business reporting.
- Used Python/Pandas and Excel for data processing, analysis and reporting.
- Investigated data discrepancies and supported finance-related analysis using Quickbooks
